

For over sixty years, Orient has been bringing forth innovative products that set the benchmark against the finest. This commitment has helped it become a household name, not just in India but also around the world. Today, Orient's home appliances and home comfort portfolios include a wide range of kitchen appliances, fabric care products and room heating solutions. Driven by consumer insights and market trends, every product is developed with a significant focus on quality, convenience and aesthetics. Orient Electric brings to you an opportunity to experience excellence and innovation in kitchen appliances by bringing to India, well-known global company De'Longhi Group.

The De'Longhi Group is present in 33 countries with direct commercial subsidiaries and sells its products worldwide with a commitment to create innovations that bring convenience and style into every customer's home, making the everyday better. Coupled with the strength of Orient Electric in marketing, distribution and servicing, this association brings versatile products with timeless design that are bound to delight the discerning consumer.

De'Longhi Group

Fully automatic coffee machines

The espresso coffee maker for excellence is the bean to cup coffee maker, which stands out for its built-in coffee grinder and professional infusion unit. This type of machine ensures that you always achieve a perfect espresso like those served in coffee shops. The coffee maker automatically calculates the correct amount of coffee powder and water required as well as the correct pressure. The De'Longhi range offers a series of exclusive features above all the unique LatteCrema System.

Pump-driven coffee makers

If experiencing new blends and coffee brands is something you do not want to miss, and you also want to be free to choose between coffee powder and Single Serve E.S.E. coffee pods, then the new Traditional Pump Makers are tailor-made for you. Furthermore in the last years pump-driven coffee makers have significantly evolved by combining technical perfection with style, bringing the Barista's touch directly to your everyday life.

Drip Coffee Makers

The Drip coffee is a very simple system to brew coffee. The water in the tank is pushed towards the heating element at the base of the machine. Hot water then passes through a tube, with internal outlet at the top of the machine before passing through the coffee filter. Drip coffee has a very mild flavour but in fact contains more caffeine than espresso as the water remains in contact with the coffee for a longer period thus absorbing its aroma, oils and caffeine.

Steam coffee makers

The steam coffee maker derives from moka, its coffee extraction process being very similar, with pressured hot water passed through coffee powder and filters. In moka the pressure is of approximately 2 bar, while in steam machines the pressure is of 3.5 bar. Flavour is similar to that of moka coffee: it is a mild coffee, which doesn't have the traditional hazelnut coloured "cream" on its surface.

Combi coffee makers

Combi coffee makers are a combination of espresso and filter coffee makers or steam and filter coffee makers; perfect for coffee lovers who don't want to give up filter coffee. All De'Longhi combi coffee makers are also equipped with a "Cappuccino System", a device which combines steam, air and milk in the preparation of a thick, luxurious froth for the perfect cappuccino.

Grinders

The right coffee grinder plays a big role in making a great cup of coffee. A fresh aromatic and flavourful cup of coffee is also dependent on the fineness or coarseness of the grind, which should be neither too fine nor too coarse. The simplest coffee grinders are those with blades that smash coffee beans to bits with two very fast moving blades.

From BEAN to CUP

Create barista quality coffee at home using your favourite fresh coffee beans. Every step your barista takes is replicated inside a De'Longhi Fully Automatic coffee machine.

ESPRESSO with One Touch

Deliver perfect coffee shop coffees at the touch of a button, extracting espresso with a strong crema every time, make longer americanos or froth milk manually for a real barista experience.

CAPPUCCINO with One Touch

Deliver perfect coffee shop coffees at the touch of a button, frothing or steaming milk automatically to create cappuccino, coffee lattes, flat whites and more.

Unlimited PERSONALIZATION

With up to 6 user profiles and up to 10 pre-programmed beverages, De'Longhi Fully Automatic coffee machines place coffee personalisation in the palm of your hand.

LatteCrema SYSTEM

The De'Longhi LatteCrema System mixes steam, air and milk in the correct proportions to always deliver best in class foam for all of your favourite coffee based beverages.

The secret behind perfect milk foam De'Longhi's engineers have perfected the method of skilfully mixing air, milk and steam with absolute accuracy to create the ultimate soft but compact milk froth, just like a professional Barista! The desired level of foam can be selected thanks to the regulator dial.

From hot to frothed milk
The dedicated steaming system works independently from the coffee preparation process to quickly generate steam for either a silky, smooth hot milk or a velvety soft milk foam. The high-precision electronic control always ensures the necessary quantity of steam is generated at the optimal temperature to create the perfect in-cup results.

INTEGRATED THERMAL MILK CARAFE with Automatic Cleaning

With the integrated thermal milk carafe, milk never enters inside the machine which prevents bacterial formation. Automatic cleaning allows easy cleaning of the whole milk carafe system – so the milk carafe can be placed in the fridge after use.
